MARCO ANTONIO CASTILLO DELGADO

Full Stack Developer
Guadalajara, Mexico | +52 33 2536 6795 | marcocastillo1997@gmail.com | castillodelgado.github.io

PROFILE

Software developer with professional frontend and full-stack experience using Vue.js, React, Java Spring, and MySQL. Builds applications with Laravel, Inertia.js, and Nuxt.js, with experience in real-time updates, production troubleshooting, and cloud deployment. Currently integrating Claude Code and Codex throughout development and testing workflows. Uses Lovable to create landing pages for clients.

PROFESSIONAL EXPERIENCE

Lagersoft Games | Frontend Developer | 2023 - 2026

- Developed Vue.js interfaces for a sports betting platform serving approximately 10,000 daily active users; implemented real-time sports event updates with connection management and automatic reconnection.
- Implemented frontend business logic for odds changes, event cancellations and postponements, and their effects on related bets, keeping displayed information consistent.
- Diagnosed and fixed production issues using Sentry traces and LogRocket session replays; fixes underwent QA validation before release. Worked in a codebase with unit tests.

Emergys | Web Developer | 2021

- Developed a React frontend for a gas distributor’s payroll application, integrating backend APIs for user administration and payroll workflows.
- Took over Java Spring backend responsibilities, implementing payment table management and payment calculation rules based on sales, employee rank, and tenure; integrated these features with the frontend using MySQL for persistence.
- Participated in application deployment with Docker on Google Cloud Platform.

KronosoftMX | ReactJS Frontend Developer | 2020

- Built a React frontend for bulk invoicing, including user, invoice, and file administration; integrated backend services supporting the invoice certification workflow.

INDEPENDENT PROJECTS

Blog platform | Laravel, Vue.js, Inertia.js, MySQL, AWS

- Built and administer a full-stack blog with user accounts, post creation and editing, image uploads, and content deletion. Connected Laravel and Vue.js through Inertia.js; deployed using EC2 instances and AWS buckets.

Philips Hue animation editor | Nuxt.js, JavaScript, MySQL | In development

- Implemented user registration and a visual interface to create lighting animations and save them to a user profile. Integrated Philips Hue Bridge for playback on physical lights, tested on a local network.

ADDITIONAL EXPERIENCE

Flex | Product Engineer, 2020 - 2022; Product Technician, 2017 - 2019; Debug Technician, 2016 - 2017. Experience in PCBA NPI, engineering changes, customer coordination, and electronics diagnostics.

TECHNICAL SKILLS

Frontend: JavaScript, Vue.js, React, Nuxt.js, Inertia.js. Backend and data: Laravel, Java Spring, MySQL. Delivery and quality: Git, Docker, AWS EC2, Google Cloud Platform, Sentry, LogRocket, unit testing.

EDUCATION AND LANGUAGES

Centro de Enseñanza Técnica Industrial (CETI), Guadalajara, Mexico

Software Development Engineering coursework, 2017 - 2020 (degree not completed)

Technician in Electricity and Electronics, 2012 - 2016

Spanish: Native | English: Proficient | German: Basic
